

Tournament Registration Procedures

Deck lists are required to be submitted to tim@jascogames.com by 4pm Pacific, Friday July 17th. Decks must abide by the legality/ban listings on the jasco games website for the Retro Event series.

In addition to a deck list, players must submit their Discord username. All players will be required to use the official discord server for communication during the tournament.

Event Procedures:

If a judge clarification or ruling is necessary, one of the players in the match must tag a judge with @judge in the #judge-rulings channel of the discord server, including the table channel they are using for voice chat.

Players must provide their in-game details to the judges before each round. This is so that judges are able to enter into the game room and view the match at their convenience. All rooms must be able to accommodate a total of 6 accounts. 2 players, up to two judges, and up to 2 commentators. Any commentators will only join in spectator mode.

Timed Rounds:

After pairings announcements, players will be given 10 minutes to set up for their matches. Rounds will be the standard 60 minutes. Players will be given time updates in the discord at the official start of the round, halfway through, and at 5 minutes left. At the end of the round, players will have no more than 10 minutes to report their results.
